PROFIL

I'm a French student in a Front-end development course and living in Tokyo. The University wasn't up to date on technologies. In the same time, I got passioned for web development so I chose the most updated and affordable courses. I wanted to begin with Frontend, then Back end to finish with web application.

After being graduated from Open Classroom, I get plan to get the certification from **Harvard CS50** (Mobile App Development with React Native and Web Programming with Python / JavaScript) and **IBM** (Developing App with Node.JS and React)

I'm still a student but I want to improve myself with a part-time Job different than Konbini or Yamato. Mostly I worked alone so it will be a good opportunity to work in a different environment

HOBBY

Sports as fitness and running
Photographer
Reading books and listening
Podcasts

EDUCATION

Université Grenoble-Alpes
2017-2020
Mathematics, physics, electronics, Java, JavaScript, Python
